

Dear Patient,

I am writing to inform you that **July 26** will be my last day caring for patients at Kelsey-Seybold Clinic. It has been an honor and privilege to be your physician, and I have enjoyed the relationship we have built over the years.

Continuing your medical care is important. The Palliative Care team will continue to provide care until you are assigned a new provider. The team will have access to your medical history, including prescription medications, labs and test results, and your health history information.

If you need prescription refills before your next appointment, please reach out to your primary care physician or the Palliative Care department at **713-442-0768**.

Best wishes for your continued health.

Sincerely,

*Sherry Lemley, MD*
